RE: NWB Technical Review of 2025 Annual Report for the Water Licence No: 8AC-EUR2331; Eureka High Arctic Weather Station Project

Dear Jean-Philippe Cloutier-Dussault:

The Nunavut Water Board (NWB or Board) has completed a technical review of the 2025 Annual Report (Report) for Water Licence No: 8AC-EUR2331 (Licence) issued to the Department of Environment (Licensee or ECCC).

On June 10, 2026, the NWB acknowledged receipt of the Annual Report, Eureka Fuel Spill Emergency Plan, April 2026 and Eureka Operating & Maintenance Manual - Wastewater Treatment Plant, February 2026 and provided them to the Qikiqtani distribution list for a two-month public review. A submission was received from Fisheries and Oceans Canada (DFO)[1] on August 10, 2026. DFO in their letter, stated that they do not have any comments but reminded the Licensee that it's their responsibility to review and follow DFO's protective measures for fish and fish habitat and standard codes of practice. No other comments were received.

The Eureka Fuel Spill Emergency Plan, April 2026 and Eureka Operating & Maintenance Manual - Wastewater Treatment Plant, February 2026 were submitted to address the comments received from Crown Indigenous Relations and Northern Affairs (CIRNA)[2] as part of the 2024 Annual Report Review.

Copies of all documents received during Report's review can be accessed through the NWB's Public Registry using the following link:
