Hi Andrew,

Just a heads up, as required by our NWB licence agreement, we wanted to inform you that Eureka is tentatively planning the sewage decantation to coincide with the July 6-7 produce flight. You said that you would be in Eureka with PCSP in early July and perhaps you can be there at the time of the decant for sampling as well.

We will receive the official decant dates from the SPM in Eureka shortly and will send those along as soon as we receive it.

Cheers,

Carl

Carl,

Just to remind you , I will be sending you the official message stating our intent to start pump our sewage for our July 6-7 Produce flight.

You will be here, maybe you can do it, LOL.
