Hi Karén and Brad,

We are writing to request a meeting between our team, the Nunavut Water Board (NWB), and the Government of Nunavut. The main objective of this meeting is to discuss the Government of Nunavut's comments on our Site-Specific Target Levels (SSTL) approval request related to Water Licence 8AC-EUR2331.

We plan to provide an overview of the Human Health and Ecological Risk Assessment and how the SSTLs were developed for surface water, sediment, and soil at the Eureka HAWS. We believe this will offer clarity and facilitate an open discussion about the concerns raised. Specifically, we aim to understand the origins of some of the comments and address any questions or issues that may exist.

Given the importance of this matter, we would like to request an extension to respond to the comments from the Government of Nunavut and CIRNAC until October 18. This extension will allow us to incorporate any insights gained from the proposed meeting into our response.

Could you please let us know your availability either October 1st or 2nd for this meeting?

Thank you,

Jean-Philippe Cloutier-Dussault
