Re: Notification of intent to modify Eureka fuel pipeline and required review and approvals for engineering drawings prior to construction

Dear Mr. Kharatyan,

We are requesting a review and approval of the Eureka fuel pipeline retrofit construction engineered drawings and specifications in order to proceed with construction to replace 3 lengths of single wall underground fuel pipeline with that of double wall fuel pipeline. Initially the construction schedule indicated an on-site construction start date of July 30th allowing a minimum 60day period for review as stated in the Eureka water licence 3BC-EUR1116. However, upon tender close and contract award, we were advised by the awarded construction contractor that their intention was to be on site and commence construction by the first week of June. We therefore would like to request a shortened review period, if possible, in order to meet the new construction schedule.

Would you please advise as to the possibility of obtaining approvals within this 30day time period?

Sincerely,

Carl Carroll
