**Submitted to:**

**Nunavut Water Board**

**For**

**Licences: NWB6BAF0409 - Type "B"  
BAF-3, Brevoort Island, NU**

**Submitted by: Nasittuq Corporation**

**17 March 2007**

This Annual Report is submitted to the Nunavut Water Board as stipulated in Para. 1, Part B, General Conditions of the following licences:

Licences: NWB6BAF0409 Type "B"

## **NUNAVUT WATER LICENCE: NWB6BAF0409 Type “B”**

### **Brevoort Island - North Warning System Long Range Radar Site – BAF-3**

The annual operation and maintenance (O&M) activities at Brevoort Island during the reporting period included the quarterly preventive maintenance, fuel tank cleaning and inspection, routine infrastructure assessment and maintenance; e.g., sewage handling system overhaul, and fuel resupply.

#### **Water Use and Waste Disposal**

The average daily water use at Brevoort Island during this reporting period was well below the stipulated maximum volume as indicated in the NWB water licence. The waste management was consistent with the Nasittuq Environmental Protection Plan, and meeting the terms and conditions stipulated in the NWB water licence for the Brevoort Island (BAF-3) radar site.

#### **Summary of waste retrograded**

Due to insufficient volume of hazardous and non-hazardous waste generated at the Brevoort radar site, no retrograde waste took place in the summer of 2006

#### **Monitoring Program**

No monitoring program was established during this reporting period.

#### **Product Spills**

No product spills occurred during this reporting period.

**Revisions to the ERP**

No revisions have been effected during this reporting period.

**Progressive reclamation work undertaken**

None undertaken.
