Thu, Jul 2, 2015 at 9:06 AM

Good Morning

On March 20, 2015 the Board received the Application for amendment of 3BC-CAM0919 made by Department of National Defense, Government of Canada.

A preliminary technical review identified application deficiencies that should be addressed before the Application can be processed; on April 10 an email was sent detailing those issues (included with this email). The Board has not received any answer yet.

The Application can not be processed until the issues have been satisfactorily addressed.

Regards
Sonia Aredes

Subject: 3BC-CAM0919 Amendment Application
To: ian.creighton3@forces.gc.ca, Licensing Department <licensing@nwb-oen.ca>

Good afternoon,

I am the Technical Advisor assigned to this file. A preliminary technical review has identified deficiencies that have to be addressed before the Application can be processed; issues identified and information required are detailed below:

Issue No.1: Block 2 of Application Form (Licensee Representative Contact Information)

The authorization letter confirming that the Licensee representative is NWS Facilities Manager was not submitted.

information required: Authorization Letter.

- The pH of the sewage effluent as reported in Analysis's Certificate of September 2012 is equal to 5.4. This value is outside of the accepted range of pH values (6 to 9), as set under Part D, Item 9 of the 3BC-CAM0914.

Inform the date on which the Inspector was notified of this issue.

- The Analysis's Certificate of the sewage effluent of October 2012 is missing

Information required: Certificate of Analysis of October 2012.

Sonia Aredes
