Andrea:

In response to your question below, I suspect it's ok for DND to obtain water from the EC site so long as (1) EC is not exceeding the volume of water permitted under its 3BC-EUR0611 licence, which is 10,000 cubic metres annually and (2) DND has an approved wastewater treatment/disposal plan. The latter is subject to approval with the DND application.

Feel free to contact me if you want to discuss further (403-697-7897). Otherwise INAC can include the issue in its submission and it will be addressed in the decision by the Board.

Thanks for the note on this.

Good afternoon Andrea - I have forwarded this query over to our technical staff for a response.

Don/Steve - please provide a response and cc to the office. Thanks.
Regards,

Subject: Question (?): New Application form for the Dept. of National Defence, Eureka Project

Hi Phyllis,

I am reviewing the new application form for the Dept. of National Defence, Eureka Project.

In the Supplementary questionnaire (Ques. #26) it says that "Water is obtained from the Environment Canada Weather Station located adjacent to the site. Environment Canada currently holds a license for water use and waste disposal (3BC-EUR0611). Water is trucked from the Env. Canada reservoir to Eureka Project where it is placed into the cistern system."

I had a look at Environment Canada's water Licence 3BC-EUR0611 for their Weather Station and it does not say anything in this license about any other Project coming in taking water under their water license. I am a little

confused on what might be going on here. Can you help clarify this for me?!?

Thanks

Yours truly,

Andrea Cull, B.Sc.
