

## **Appendix C**

### **Monitoring Program Stations No. ERK-3-4-5**

**Year:** 2011

**Description:** Runoff and Leachate.

**Reference:** 3BC-ERK1015, Part J, Item 5.

### **Results:**

#### **June (Runoff Season)**

The Department of National Defence (DND) was successful in collecting and analyzing samples at all Monitoring Program Stations (ERK-3-4-5) during the period of runoff in June 2011.

#### **July**

The DND Sampling Team experienced logistical and weather restraints and could not arrive on site in July 2011 (originally to arrive with the Inspector on 19 July 2011). The summer 2011 station crew at CFS Eureka departed the station at the end of July, ending the CFS Eureka operation for the year.

#### **August**

CFS Eureka was closed for the season.

See Appendix G for Analysis Results.

### **Notes:**

DND is not anticipating any issues regarding the 2012 Monitoring Program season, and is taking measures to establish a sampling schedule to capture runoff and seepage seasons based on Eureka's observed climatology.
