

Appendix B

List of Waste Disposal Activities

Year: 2010 (As of issuance of licence: June 18, 2010.)

Reference: 3BC-ERK1015, Part B, 1a.

Landfill:

- Deposition of non-hazardous, bulky and all acceptable waste materials to site.

Sewage Treatment Facility:

- Sewage and waste water from the summer operations of CFS Eureka were directed to the Sewage Treatment Facility (DND Sewage Lagoon).
- There were/are no intentions to discharge the Sewage Lagoon in 2010 and 2011, respectively.

Battery Dump:

- No waste was deposited at this site.
- No waste deposition is allowed at this site.

Barrel Dump:

- Crushed empty barrels were placed at this site.

Landfarm:

- There were no disposal activities at this site in 2010.

Hazardous Waste Backhaul:

- Hazardous wastes (ie. Waste Batteries, Waste Fuels, Waste Oils, etc) were placed in drums.
- 20 drums (Approx. 205 Litres per drum) of waste oil were backhauled via sealift contracted by Environment Canada Weather Station at Eureka.
- 48 used car batteries were backhauled via sealift (Coast Guard, Nunavut Eastern Arctic Shipping Inc., and Nunavut Sealink and Supply Inc.) contracted by Environment Canada Weather Station at Eureka.
- Final destination of backhauled waste and disposal (Clean Harbours Inc.): Valleyfield, Quebec.

Notes:

DND is committed in removing all generated hazardous waste from CFS Eureka to satisfy the Water Licence conditions; there are only 12 drums of hazardous waste remaining on site from the previous year. These 12 drums plus any identified hazardous wastes will be backhauled during the summer 2011 operation season.
