

Appendix C

Monitoring Program Station No. ERK-1

Year: 2010 (As of issuance of licence: June 18, 2010.)

Name: Sewage Treatment Facility

Description: **Sampling of Effluent prior to release.**

Results:

Between the dates of issuance for **3BC-ERK1015** on June 18, 2010 to December 31st, 2010, there was no intent or plan to release any effluent from the Sewage Treatment Facility (DND Sewage Lagoon).

As there were no plans or intent to release effluent from the DND Sewage Lagoon during the time period mentioned above, the collection of samples and analysis were not required for **3BC-ERK1015, Part J, Item 3.**

Effluent is produced during the warm season as CFS Eureka operations typically begin from early May and ending in the middle of September. CFS Eureka is closed during the winter season period where there is no on-site staff and no waste/effluent generation. It should be noted that the opening and closing dates vary by year due to logistical and military factors.
