to the  
Nunavut Water Board**

**Licensee: Department of National Defence,  
Government of Canada**

**Licence: 3BC-FOD0919 - Type "B"**

**Location: FOX-3 North Warning System Site,  
Dewar Lakes, Qikiqtani Region, Nunavut**

**Report prepared by: Nasittuq Corporation,  
26 March 2012**

## **2011 Annual Report to the Nunavut Water Board**

**Licensee:** Department of National Defence,  
Government of Canada

**Licence:** 3BC-FOD0919 - Type "B"

**Location:** FOX-3 North Warning System Site,  
Dewar Lakes, Qikiqtani Region, Nunavut

**Report prepared by:** Nasittuq Corporation,  
26 March 2012

### **Executive Summary**

This 2011 Annual Report to the Nunavut Water Board (NWB) is submitted as required by the licence issued 10 September 2009 3BC-FOD0919 - Type "B", Part B. General Conditions, paragraph 1.

FOX-3 is an unattended (unmanned) North Warning System radar site at Dewar Lakes, Nunavut. The site is visited quarterly for preventive maintenance inspections and as required for other work by Nasittuq staff from FOX-M, Hall Beach, Nunavut. The site was temporarily attended (manned) due to project activity in July, August, October, and November.

The annual water usage was 122.4 cubic meters of water which is below the maximum of 1,440 cubic meters allowed annually by the current licence.

The water contained in the berms of fuel storage facilities was sent for laboratory analysis and confirmed to be within effluent quality limits before the water was pumped out of the berms.

Hazardous waste was flown from landlocked FOX-3 to FOX-M (radar site at Hall Beach) where it was loaded onto the sealift and sent for disposal outside of Nunavut. The hazardous waste went to Recyclex Inc, 8381 Place Marien, Montreal, QC, H1B 5W6. The waste was 120 drums of assorted waste (glycol, paint, oil, fuel filters, oil filters, etc.), 1 crate of paint related material, and 1 crate containing 2 empty propane cylinders.

Nonhazardous domestic solid waste was flown out to FOX-M and disposed of through a contract with the Municipality of Hall Beach at the local landfill. Nasittuq has documented authorization from the community for receiving the waste.

The sump for the sewage outfall was not pumped out therefore no samples were taken for laboratory analysis.

Five outdoor spills occurred. The spills were:

- a. NT-NU Spill Report # 11-268. One liter of Jet A1 fuel leaked from the fittings of First Air's C-130 aircraft at the apron. The contaminated gravel was removed immediately and placed in a container for future disposal at a hazardous waste disposal facility outside of Nunavut;
- b. NT-NU Spill Report # 11-308. The fitting on the truck fill line from tank W22E was weeping fuel though its threads, likely due to thermal expansion of the fuel. Five liters Jet A1 leaked out. A drip pan and sorbent were placed under the leak. The fuel line was drained. Contaminated soil was removed into a drum for future disposal outside of Nunavut. The fitting will be replaced by a blind flange to be installed in 2012 once the snow is gone;
- c. NT-NU Spill Report # 11-329. Ten liters of ethylene glycol leaked from an air relief valve of a diesel engine generator (DEG). Staff repaired the leak. Glycol inside the building was cleaned up. Some glycol leaked through the floor to the ground below. Contaminated soil under the building was removed for future disposal outside of Nunavut;
- d. NT-NU Spill Report # 11- 347. While cleaning underground piping for decommissioning, a high pressure hose slipped off of the fuel line. Nine liters of Jet A1 fuel and water mixture sprayed. The contaminated soil was placed in a drum for future disposal outside of Nunavut; and
- e. NT-NU Spill Report # 11-468. 200 liters of 60% ethylene glycol solution leaked from a soldered joint on the DEG 3 heat recovery system. After weather delays, staff arrived on-site and completed repairs. The glycol inside the building was cleaned up with sorbent. The glycol that went through the floor onto the ground below could not be cleaned up due to 20 foot snow drifts around the building. A spill clean up plan has been formulated and will be implemented before the 2012 spring melt.

The Spill Contingency Plan was not revised.

## **Introduction**

This 2011 Annual Report to the Nunavut Water Board (NWB) is submitted as required by the licence issued 10 September 2009 3BC-FOD0919 - Type "B", Part B. General Conditions, paragraph 1.

FOX-3 is an unattended (unmanned) North Warning System radar site at Dewar Lakes, Nunavut. The site is visited quarterly for preventive maintenance inspections and as required for other work by Nasittuq staff from FOX-M, Hall Beach, Nunavut. The site was temporarily attended (manned) due to project activity in July, August, October, and November.

## **Water Drawn from FOD-1**

The annual water usage was 122.4 cubic meters of water which is below the maximum of 1,440 cubic meters allowed annually by the current licence.

**Table 1. Monthly and annual raw water drawn at FOX-3.**

<b>Month</b>	<b>Raw water drawn in cubic meters (m<sup>3</sup>)</b>
January	0
February	0
March	0
April	0
May	5.7
June	39.7
July	41.5
August	35.5
September	
October	
November	0
December	0
<b>TOTAL</b>	<b>122.4</b>

## **Hazardous Waste and Waste Oil Disposal**

Hazardous waste was flown from landlocked FOX-3 to FOX-M (radar site at Hall Beach) where it was loaded onto the sealift and sent for disposal. Hazardous waste and waste oil were sent to an approved hazardous waste disposal site outside of Nunavut as required by the licence. The waste was sent to Recyclex Inc, 8381 Place Marien, Montreal, QC, H1B 5W6. The waste receiver number for Recyclex Inc. is 7610-06-01-0172311-400086392.

See Table 2 below for the list of items sent for disposal.

See **Annex A** for the shipping documents: the completed movement documents for waste regulated under the Transportation of Dangerous Goods Regulations (TDGR) and Nasittuq manifests for nonregulated wastes.

**Table 2. Summary of waste sent for disposal from FOX-3.**

Site	Description, TDG shipping name	Quantity	Movement Document or Nasittuq Manifest # (from FOX-M to Recyclex)
FOX-3	Waste fuel filters  Waste environmentally hazardous substance solid (fuel, aviation, turbine engine)	1 drum	Mov. Doc. 2464140-9 <sup>1</sup>
FOX-3	Waste paint	2 drums	Mov. Doc. 2464219-1 <sup>2</sup>
FOX-3	Waste paint related materials	1 crate	Mov. Doc. 2464219-1 <sup>3</sup>
FOX-3	Waste oily rags  Waste solids containing flammable liquid, n.o.s. (fuel, aviation, turbine engine)	1 drum	Mov. Doc. 2464220-9 <sup>4</sup>

<sup>1</sup> The movement document shows waste generated at FOX-M (3 drums) and FOX-3 (1 drum) for a total of 4 drums. The movement document's other lines are for waste batteries from FOX-M.

<sup>2</sup> The movement document shows waste generated at FOX-M (7 drums, 1 crate) and FOX-3 (2 drums) for a total of 9 drums and 1 crate.

<sup>3</sup> The movement document shows waste generated at FOX-M (2 drums) and FOX-3 (1 crate) for a total of 2 drums and 1 crate.

<sup>4</sup> The movement document shows waste generated at FOX-M (3 drums of waste fuel/POL soaked absorbent, 8 drums of waste oily rags) and FOX-3 (1 drum of waste oily rags) for a total of 12 drums. The movement document's other lines are for waste isopropanol from FOX-M.

**Table 2. Summary of waste sent for disposal from FOX-3 (continued)**

Site	Description, TDG shipping name	Quantity	Movement Document or Nasittuq Manifest # (from FOX-M to Recyclex)
FOX-3	Waste propane	1 crate of 2 empty cylinders	Nas. Man. 26795
FOX-3	Waste rags contaminated with glycol	2 drums	Nas. Man. 26635 <sup>5</sup> , 26778
FOX-3	Waste glycol	98 drums	Nas. Man. 26662, 26663, 26664, 26665, 26666, 26667, 26668, 26669, 26681, 26683, 26684, 26685, 26686, 26687, 26688, 26689, 26690, 26691, 26703, 26704, 26705, 26706, 26707, 26708, 26709, 26710, 26711, 26712, 26713, 26714, 26716, 26717, 26718, 26719, 26720, 26776
FOX-3	Waste oil	14 drums	Nas. Man. 26771 <sup>6</sup> , 26772 <sup>6</sup> , 26773 <sup>6</sup> , 26774 <sup>6</sup>
FOX-3	Waste oil filters	1 drum	Nas. Man. 26782
FOX-3	Waste glycol contaminated soil	1 drum	Nas. Man. 26782

<sup>5</sup> Nasittuq Manifest 26635: The first line is from FOX-3 (waste rags contaminated with glycol); the second line is from FOX-M (waste oil filters).

<sup>6</sup> The Nasittuq Manifest shows waste oil filters, but waste oil was actually shipped.

### **Nonhazardous Solid Waste Disposal**

Nonhazardous domestic solid waste was flown out to FOX-M and disposed of through a contract with the Municipality of Hall Beach at the local landfill. Nasittuq has documented authorization from the community for receiving the waste. The FOX-3 landfill still exists (see **Annex B**).

Solid waste records were not available for June to October. Therefore the data for these months in Table 3 were calculated using an average of 1 kg waste per person per day multiplied by the daily site population.

**Table 3. Monthly and annual nonhazardous domestic solid waste sent for disposal from FOX-3.**

<b>Month</b>	<b>Waste generated (kg)</b>
January	0
February	0
March	107
April	163
May	517
June	118
July	312
August	424
September	74
October	51
November	0
December	0
<b>TOTAL</b>	<b>1,766</b>

## **Monitoring Program**

See **Annex C** for the location of the sewage effluent outfall, FOD-2, with GPS co-ordinates. A sump for the sewage outfall was built in 2010.

**Annex D** is blank. The sump for the sewage outfall was not pumped out therefore no samples were taken for laboratory analysis.

See **Annex E** for the list of bermed fuel storage facilities, FOD-3, with GPS co-ordinates.

See **Annex F** for the analysis of berm water (water contained in the berms of fuel storage facilities). The results were confirmed to be within effluent quality limits before the water was pumped out of the berms.

## **Spills (Unauthorized Discharges)**

Five outdoor spills occurred. They are listed in Table 4 below.

**Table 4. Outdoor spills at FOX-3.**

<b>Date, Spill #</b>	<b>Product</b>	<b>Quantity</b>	<b>Cause and follow-up action</b>	<b>Location at FOX-3</b>
07 Jul 2011, Spill # 11-268	Jet A1 fuel	1 liter	In preparation to transfer fuel from First Air's C-130 to the site's fuel system, the fittings on the C-130 fuel system were modified. While the crew completed the modifications inside the aircraft, wind funneled through the aircraft and caused a spray of fuel to land on the ramp of the aircraft. The fuel ran down the ramp and dripped onto the apron. Contaminated gravel was immediately removed from the apron and placed in a container for future disposal at a hazardous waste disposal facility outside of Nunavut.	Apron
25 Jul 2011, Spill # 11-308	Jet A1 fuel	5 liters	The fitting on the truck fill line from tank W22E was weeping fuel through its threads, likely due to thermal expansion of the fuel. Drip pan and sorbent were placed under the weep. The fuel line was drained. Contaminated soil was removed into a drum for future disposal at a hazardous waste disposal facility outside of Nunavut. A blind flange was ordered to replace the fitting. Flange arrived in the fall and will be installed in 2012 once snow is gone.	Outside berm of tank W22E

**Table 4. Outdoor spills at FOX-3 (continued)**

<b>Date, Spill #</b>	<b>Product</b>	<b>Quantity</b>	<b>Cause and follow-up action</b>	<b>Location at FOX-3</b>
13 Aug 2011, Spill # 11-329	Ethylene glycol	10 liters	Spill was caused by leaking air relief valve of a diesel engine generator (DEG). Sorbent pads were placed on the glycol and drip pans placed below the leak. Staff repaired the leak. Some glycol leaked through the floor to the ground below. Contaminated soil under the building was removed for future disposal at a hazardous waste disposal facility outside of Nunavut.	Main building
25 Aug 2011, Spill # 11-347	Jet A1 and water mixture	9 liters	While cleaning single walled underground piping for decommissioning, a high pressure hose slipped off of the fuel line and allowed a mixture of fuel and water to spray out. It is estimated that the mixture was less than 50% fuel. The contaminated soil was dug up and placed in a drum for future disposal at a hazardous waste disposal facility outside of Nunavut.	Southwest of main building
25 Dec 2011 Zulu Spill # 11-468	60% Ethylene glycol solution	200 liters	The leak was from a soldered joint on the DEG 3 heat recovery system. After weather delays, staff arrived on-site on 27 Dec 2011 and completed repairs. The glycol inside the building was cleaned up with sorbent. The glycol that went through the floor onto the ground below could not be cleaned up due to 20 foot snow drifts around the building. A spill clean up plan has been formulated and will be implemented before the 2012 spring melt.	Main building

### **Revisions to the Spill Contingency Plan**

The Spill Contingency Plan was not revised.

### **Progressive reclamation work undertaken**

None undertaken.
