Hello All,

As I mentioned to Richard earlier this week, the QAQC plan submitted lacks some important information. I do not have access to the License so an introduction with few information about the location and some details about the general SNP will help to assess the QAQC Plan.

Please find attached the QAQC Plan requirements (the document was created for Type A Licenses but is also applicable to B-Licenses) and the checklist that will give more information.

Best regards,

Angelique Ruzindana

Thanks Angelique;

Would you be able to inform the licensee of the missing requirements of the QAQC plan? The licensee is Department of National Defence and the contact is Major A. D. Cameron Cameron.AD@forces.gc.ca their consultant is Nasittuq, contact Barb Thompson Barb.Thomson@nasittuq.com

Much appreciated.

Richard

Hello Richard,

I did a first review of the QAQC plans and noticed that some information are missing :

- 1) The Plans have to be related to the Water Licenses (Locations, etc.). The only information I see here are the Licenses numbers (from the name of the files) and the project numbers.
- 2) An introduction outlining the Surveillance Network Program would help to ensure the QAQC plan is complete.
- 3) While the Field Sampling and Lab analysis information is complete, the reporting requirements are not even mentioned.

I attach here the checklist that I use to review the QAQC plan to help you understand what information is missing.

Should you require more information, do not hesitate to contact me at 867 669 2781 (or leave a message if I'm in the lab).

Regards,

Angelique

Good morning Angelique;
```

Attached are QAQC's for 3BC-FOD0919 & 3BC-SHE0919 they are exactly the same.

Regards,
