Hi Phyllis – for neither. There are no plans to abandon any of these sites, and as far as we are concerned, these sites will be used annually for migratory bird research well into the future.

d

Good afternoon Dana, if approved, would this activity be planned for this season or next?

Regards,

Phyllis Beaulieu- 6<-->CD

Greetings Phyllis.

With regard to open burning of painted buildings upon abandonment of the site, we propose to burn buildings to reduce aircraft requirements needed to backhaul materials to Cambridge Bay.

Karrak Lake Research Station consists of 6 plywood cabins: one 20x20', four 12x16', and one 8x12'.

At the North Cabin, there is one 12x16' cabin.

At Perry River, there is one ~20x20' cabin.

Only the exteriors of these buildings are painted. The interiors consist of untreated plywood and 2x4"s.

Prior to burning, most non-combustibles would be removed (e.g., asphalt shingles). Ash and non-combustible materials would then be backhauled to Cambridge Bay or to an approved disposal facility.

There are currently no plans for abandonment of the sites.

Please contact me if there are further questions.

Thanks,

Dana

Good afternoon Dana

Our technical department has requested some additional information regarding your request for open burning. Please provide the following:

1. What is the schedule/timing of the projected open burning.
2. Describe more fully what type and quantities of material you wish to dispose of by this method.

Regards,

Phyllis Beaulieu-
