## ADDEMDUM ANNUAL REPORT

---

As part of this addendum, you will find below information relating to the 2017 exploration activities as requested by NIRB file #11EN010.

Agnico Eagle Mines Limited's Amaruq Exploration Project is located 50 kilometres (km) North-North-West of its Meadowbank Gold Mine in Nunavut. The intent of the Amaruq Exploration Project is to explore its mineral lease and claims for potential ore deposits and to develop the Whale Tail Deposit as a Meadowbank satellite pit. An exploration camp is established on the Amaruq property to undertake geological, geochemical, and/or geophysical exploration. Diamond drilling is also being used in exploring promising areas on the mineral lease and claim block.

Agnico Eagle Mines Limited's Meadowbank Exploration camp is located near Third Portage Lake adjacent to km 100 on the all-weather access road (AWAR) between the hamlet of Baker Lake and the Meadowbank mine site. In 2014, trailers located at the Meadowbank exploration camp were prepared for transport over the winter access to the Amaruq site. These were moved in early 2015. The remaining infrastructure at the Meadowbank Exploration Project camp remains in place and is still used to support exploration activities in the vicinity

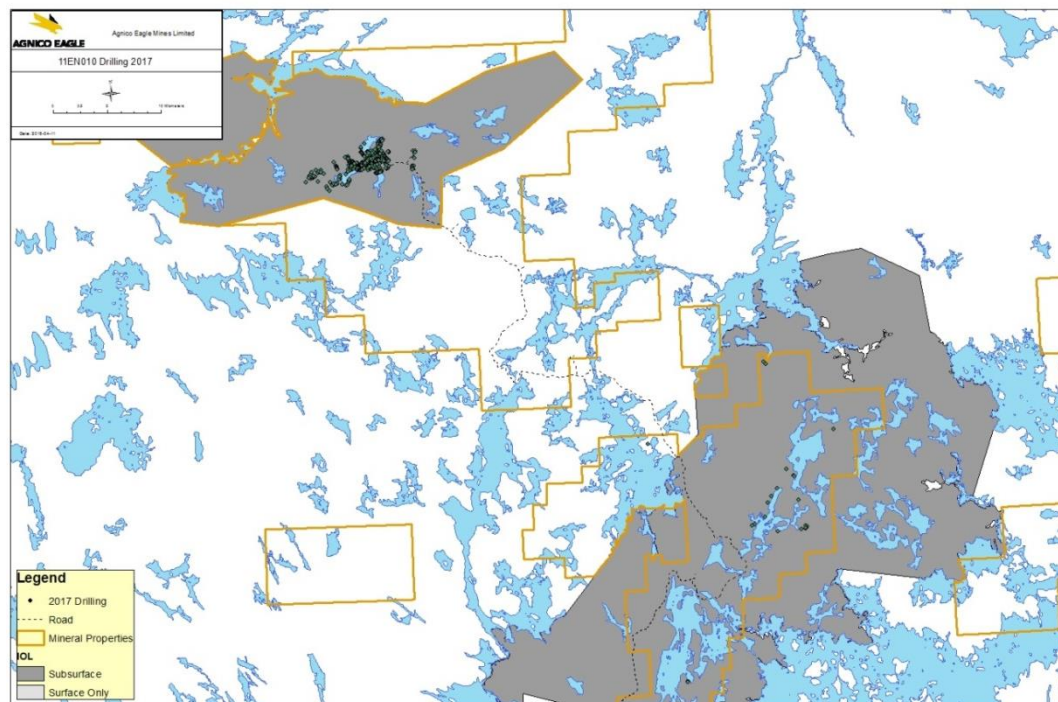

### **Annual report**

1. The Proponent shall include within its annual report for the Meadowbank Gold Project (NIRB File No. 03MN107), a comprehensive annual report of the activities undertaken as authorized by the Board for File No. 11EN010 to date. The annual report must contain at least the following information:

#### **a. A summary of activities undertaken for the year, including:**

i. a map showing the approximate location of drill sites;

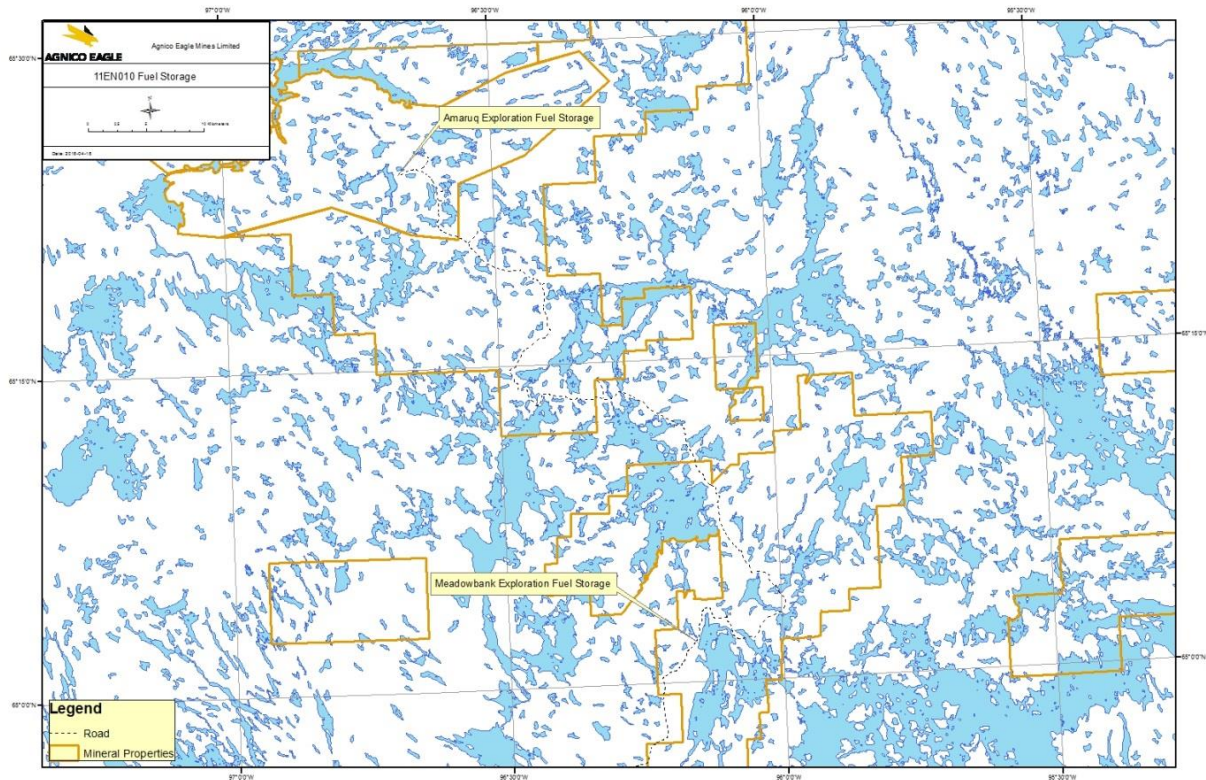

- *In 2017, more than 650 holes were drilled by Agnico Eagle Mines at the Amaruq project and 25 holes were drilled in the Meadowbank area (see Figure 1-1). All drilling areas were managed in such a manner as to reduce our environmental footprint to a minimum.*

**Agnico Eagle 2017 Drilling Program Locations**

**ii. a map showing the location of the fuel cache;**

Agnico Eagle Mines Limited's Exploration division has 2 fuel storage locations related to the NIRB decision #11EN010. One is located at the Meadowbank exploration camp and contains two 75,000 liter double walled tanks that are used to store diesel and jet fuel. The main fuel storage is located at the Amaruq exploration camp and has a capacity of 1,800,000 liters of diesel and jet fuel.

**iii. site photos;**

**Amaruq fuel storage and camp site, November 2017**

**b. A work plan for the following year, including any progressive reclamation work undertaken;**

**Amaruq**

- The Amaruq camp will be opened all year long in 2018. Camp capacity could be increased.
- Increase the capacity of various buildings on the Amaruq Camp Site, such as the kitchen, offices and dry.
- Construct gravel pads, services and maintenance buildings and install a genset near the portal exploration ramp.
- Installation of a Newterra Waste Water Treatment System in replacement of the Bionest Waste Water Treatment System.
- Construction of some exploration access roads around the Whale Tail deposit.
- Increase potable water treatment plant capacity.
- Material, equipment and fuel transport with haul trucks.
- Drilling to run all year long.
- Drilling on Whale Tail Lake during the summer, using a drill installed on a barge.
- Exploration ramp development.
- Future waste rock facility condemnation drilling and geotechnical drilling.

**Meadowbank**

- Most of the Meadowbank exploration camp was transported to Amaruq in 2015. The area and remaining infrastructures are used to support exploration activities in the vicinity.
- Drilling is planned from March to July with one drill in operation.
- Prospecting, mapping and geophysical surveying could be conducted on the entire property during the summer period.

**c. A summary of community consultations undertaken throughout the year, providing copy of materials presented to community members, a description of issues and concerns raised, discussions with community members and advice offered to the company as well as any follow-up actions that were required or taken to resolve any concerns expressed about the project proposal;**

- Discussion with the hamlet of Chesterfield was conducted in February 2017 including the exploration projects subject.
- Meeting with the Baker Lake Hunters and Trappers Organization was conducted in March 2017 concerning exploration projects.

Date	Location	Event	Purpose	Attendees
January 17, 2017	Meadowbank	Meadowbank site visit	Visit to site to have an update on the operations, site tour, Amaruq road construction	Agnico Eagle (Management) Baker Lake MLA Baker Lake Mayor
February 10, 2017 September 12, 2017 October 20, 2017	Baker Lake	HTO meeting	Presence at regular HTO meetings to answer questions on migration and road safety concerns	Agnico Eagle Baker Lake HTO
April 20, 2017	Baker Lake	Open Door Baker Lake	Open house for public for information on operations, hiring and business opportunities information, and updates on the Whale Tail project	Public meeting
July 25, 2017	Meadowbank/ Amaruq	HTO Site visit	HTO and elders visit to Amaruq area	Agnico Eagle Baker Lake HTO Elders
July 27, 2017 October 11, 2017	Baker Lake	Baker Lake Community Liaison Committee meeting	The site community liaison committee (CLC) is a locally-based, formalized way for a company to engage with local community members on topics related to the company's activities.	Agnico Eagle Meadowbank management Agnico Eagle Human Resources Mayor BL SAO Hamlet Transportation Manager EDO Youth representative DEA representative Community Health representative Community Wellness Coordinator ANC representative CLARC representative Elder representative
October 11-12, 2017 November 7-8, 2017 December 7, 2017	Meadowbank and by phone	On-Site Working Group Committee meetings	Identifies and resolves issues that arise on the project site	Kivalliq Inuit Association Agnico Eagle

**d. Summary of the consultation conducted with Government of Nunavut biologists if any and any relevant outcomes including revisions or alterations to the timing of project activities;**

- Agnico consulted with GN biologists and representatives on 3 occasions (February 22, 2017 in Ottawa, April 30th and September 20th, 2017 in Baker Lake) and corresponded numerous times regarding caribou monitoring, mitigation and studies through revisions of the Terrestrial Ecosystem Monitoring Plan (TEMP) in support of final hearings.

**e. Summary of follow-up consultation with Fisheries and Oceans Canada (DFO) regarding the final construction designs and documents requested by DFO and any recommendations issued by DFO. The summary should include a summary of all available best management practices.**

- Following a request from Agnico Eagle, on December 11<sup>th</sup> 2017, Agnico Eagle received a notification from DFO that extended NU-03-00191.3 Meadowbank Mine Authorization for Second and Third Portage Lakes from Date of issuance to December 31, 2019. No additional information was requested or recommended by DFO related to Meadowbank

Authorizations. Consultation in 2017 with DFO was focused on Whale Tail Pit offsetting planning and are not reported herein.

**f. A discussion of issues related to wildlife and environmental monitoring, including the number of cease-work orders required as a result of proximity to caribou;**

- No issues related to wildlife occurred in 2017. While caribou migration was under way, the Amaruq Exploration Access Road was closed preventively for roughly 3 days (October 28, November 2<sup>nd</sup> and November 3<sup>rd</sup>). Decisions were taken in collaboration with HTO members, KIA and the environmental team to ensure the protection of the caribou, according to the wildlife protection protocol.

**g. An analysis of the effectiveness of mitigation measures for wildlife;**

- In 2017, Agnico Eagle has conducted weekly road and regular site inspections and no issue related to wildlife were identified. Refer to Section 10 of the Amaruq Road Management Plan (March 2018) found in Appendix 5 of the Amaruq Exploration Access Road 2017 Annual Report for a complete review of the upcoming wildlife monitoring and mitigation measures in place. For the Amaruq exploration site, mitigation measures were applied when caribou herds were in the area to avoid causing disturbance. The areas were avoided and work restarted once caribou had left the area

**h. A brief summary of Wildlife Monitoring and Mitigation Plan (WMMP) results including the wildlife log and record of observations as well as any mitigation actions that were undertaken;**

- Appendix A shows the log for Wildlife monitoring related to the mineral exploration work and in Appendix B, the log for Wildlife monitoring related to the Amaruq Exploration Access road during construction.

**i. Summary of any heritage sites encountered during the project activities and any follow-up action or reporting required as a result. The summary should include a map noting the sites encountered; and,**

- Assessments of working areas were conducted from 2013 to 2017 in the Meadowbank and Amaruq areas and most of the archaeological sites found were protected by avoidance buffers. Some archaeological sites located in the areas impacted by the Amaruq exploration road construction, associated borrow pits and quarries were mitigated by the archeologists. The mitigations included shovel testing excavation of features and detailed mapping and collection. Some other sites were protected by avoidance requiring a road path, borrow pits and quarry location modifications. Complete reports were submitted to the Government of Nunavut.

**j. A summary of how the Proponent has complied with conditions contained within this Screening Decision, and all conditions as required by other authorizations associated with the project proposal.**

- The Amaruq Exploration Access Road (AEAR) was screened by NIRB on November 4<sup>th</sup>, 2015 and a Type 8BC-AEA1525 License was issued by the NWB on November 9<sup>th</sup>, 2016. In September 2017, the 64.1 kilometers road connected Meadowbank site to the Whale tail project. The widening of the road from 6.5 m to 9.5 m will commence when regulatory approval has been obtained. Agnico Eagle is expecting to start the enlargement of the road in late April or May 2018.

**k. Summary of traffic travelling via the road between Meadowbank and Amaruq.**

- Traffic was limited during road construction to authorized and essential vehicles. After September 2017, when the road was completed and connected to both sites, traffic consisted of road maintenance crews, transportation of goods and fuel supplies. As well, daily crew changes were assured via the road access. A more detailed log will be kept once the project moves forward and traffic increases significantly.
