Re: Type B Water Licence 8BC-AEA1325

Dear Ms. Beaulieu,

As a condition of the Type B licence 8BC – AEA1325,

The Licensee is required to submit to the Board for review for-construction drawings, stamped by an engineer, for all facilities designed to divert, withhold or contain water and waste at least sixty (60) days prior to construction of the Amaruq Exploration Access Road.

AEM has prepared for-construction drawings for the NWB and are attached on a CD. The drawings contain specific locations of archaeological sites that are important for construction planning but cannot be made publically available due to restrictions in the archaeological permit.

Call me if you have any questions

David Frenette
