Eric,

Thank you for this update related to file 8BC-BTN1819. The NWB looks forward to reviewing your revised construction plans and a gaining a better understanding of what the revised scope entails.

The NWB notes that the main consideration for your project to be Licensed as a Type 'B' project was the re-direction of the river around the work site. If the revised project no longer includes re-direction of flow, your project might no longer require a Type 'B' Licence. In that case, you could choose to request the board cancel Licence 8BC-BTN1819 and at the appropriate time apply for an Approval Without A Licence.

If your revised scope only drops out portions of the approved activities under 8BC-BTN1819, then an amendment might not extend beyond timelines for various submissions. If any 'new' activities have been added, the amendment would have to be a bit more extensive.

Please feel free to give me a call to discuss the different options. I am in the office Monday to Wednesday next week and then am on leave until mid-July.

All the best,

Dave

Eric,

Thank you for providing this update. Your submission of these schematics meets the requirements of Part B, Item 2 of Water Licence 8BC-BTN1819 to notify the NWB of any changes in operating plans or conditions.

From my perspective, it looks like the new plans do not add anything to the scope of activities currently approved under your Licence:

- Use sand bag coffer dam to isolate overflow culvert from the river.
- Replace existing overflow culvert
- Removal of coffer dam
- Use sand bag coffer dam to divert all flow through the overflow culvert
- Repair bridge abutments
- Removal of coffer dam.

The Board notes that, during earlier correspondence, you indicated that you would delay submission of the Environmental Protection Plan as required under Part E, Item 1 of the Licence until after you had reconsidered your construction plans.

Can you please confirm that no new scope has been added to the project plans and confirm when the Board can expect to receive an Environmental Protection Plan for the project?

Thanks!

Dave
