Good Afternoon Ed,

I was looking through my email and see this response from you with regards to my email. I must apologize, I never saw this email prior to this. Clearly it was an oversight on my part BUT luckily I heard through the grape vine that the program was moved to the garage.

So lets talk next steps as for the water authorization. From the information in your email below it seems that this license is no longer needed? Realistically the longer this license is active the more money it will cost the hamlet for the administration fees. Also as per the terms and conditions of the license an annual report is to be submitted annually regardless of the activities underway.

Let me know when you are available next week and I can set a meeting and we can run through all the necessary steps.

Again, apologies on the lateness in my response!

Christine Wilson

Hi Christine,

Thanks for your email. I believe that we should probably discuss this a little prior to your arrival. The drill training site has been moved to an indoor facility (an old hamlet garage) and the water that it uses is supplied by our hamlet water trucks through a tank. The drill operates within the hamlet and is coordinated by the hamlet so I would think that it should come under that license. Last year we supplied water over an 8 week period and this year we have one course planned which equates to supplying water for four weeks.

Originally this was set up outside and operated independently drawing water from a small pond but that ended about two years ago if my memory is correct!

Please give me a call at your convenience,

Thanks, Ed

Ed Murphy

Good Afternoon,

Please find attached a copy of an introduction letter from the Drilling Training Project 8BD-ARV1116.

Also attached is a annual reporting form and guide which will assist in Annual reports required under Part B item two (2) of your license.

Also find attached a copy of your water license. I recommend you review and have a copy available for the operators under this license during the inspection.

I will need some one to meet with me in the afternoon on Friday the 12th for a short amount of time. Please provide me with contact information for a person who is familiar with the project.

Thank you in advance for you cooperation, please do not hesitate to contact me 222-6482
