**RE: Comments Response for Qulliq Energy Corporation Baker Lake Geothermal Project Water Licence Application**

Qulliq Energy Corporation (QEC) has reviewed the comments provided from Crown-Indigenous Relations and Northern Affairs Canada (CIRNAC) and Environment and Climate Change Canada (ECCC) regarding the Baker Lake Geothermal Project. QEC would like to express our appreciation for the time these agencies and individuals spent reviewing the proposed Project and providing their comments.

In response to the comments provided by CIRNAC and ECCC the Baker Lake Geothermal Project management Plans have been updated to reflect the following:

1. Section 1.4 of the Environmental Management Plan has been updated to remove the Fuel Management Plan in the list of other plans, as the fuel plan is incorporated in the Spill Contingency and Fuel Management Plan.
2. Sections 4.3 of the Emergency Response Plan and 8.2 of the Spill Contingency and Fuel Management Plan (Chain of Command) have been updated to include the correspondence plan with other agencies should a larger spill require an integrated incident command structure.
3. Section 3 of the Abandonment and Restoration Plan has been updated to clarify that waste will be disposed of in the Hamlet of Baker Lake and not in the lake itself.
