Re: Clarification of Scope for Qulliq Energy Corp.'s "Iqaluit Hydro-Electric Baseline Study" project proposal

Dear Parties:

On December 21, 2012 the Nunavut Impact Review Board (NIRB) solicited comments for Qulliq Energy Corp.'s (QEC or the Proponent) "Iqaluit Hydro-Electric Baseline Study" project proposal. Due to inconsistencies in application materials the NIRB *incorrectly* listed in the project activities section that "Fuel would be stored/cached at both the Armshow River camp and the Jaynes Inlet Emergency camp in lined containment." On January 21, 2013 the NIRB received clarification that the Proponent has **not** committed to the use of secondary containment for fuel drums.

The NIRB originally requested that comment submissions for this file be directed to our office by January 24, 2013. Due to the clarification of project scope, the NIRB is extending the commenting period for this file and requests that parties submit comments to our office by **January 31, 2013**.

If you have any questions or concerns, please contact the undersigned at (867) 983-4603 or tbolt@nirb.ca.

Sincerely,

Tannis Bolt
