Hi Shelly,

Thanks for the submission. As you noted, "(t)here is no indication of any sulphide mineralization or metal composition such as lead or zinc in the granular materials that would contribute to ARD/ML in this report", so the applicant would be relying on third-party information. As I've mentioned on the phone to Brittany a few days ago, the responsibility for compliance to licence conditions is with the holder of the licence. I understand this is probably not the answer you were hoping to hear; however, the Board ought to act in accordance with its mandate.

Best regards,
Assol

Hello Assol,

Just wondering if you were able to answer this or if this is something that the board has to consider in the final review.

Apologies for the persistence but as you're aware the construction schedule is imminent at this point and any additional work that may be required will severely impact the project.

I will follow up with a phone call today. The time difference between us is +3.5 hours where I am located in NL.

Kind regards,

Shelly

Thank you for confirming.

Now I understand it is up to the board to make the approval and issue a permit.

I'd like to share some information collected during the desktop review for the ARD/ML inquiry. The Gov NU Manager of Lands Administration was able to provide us with a copy of a separate report from the one which was corrupted. This is a Baffin Region Granular Resources Management Report completed in 2004. This report indicates that the pit run or borrow materials have been used over the course of several years for general fill, embankment, road sub-base and culvert bedding and that the granular materials comprise of naturally occurring sand, gravel and cobbles. There is no indication of any sulphide mineralization or metal composition such as lead or zinc in the granular materials that would contribute to ARD/ML in this report.

If the corrupted file on the 2004 Aggregate study was available, it may have been more descriptive towards the likelihood of the borrow material in the Sanikiluaq quarry being non-ARD/ML. I could ask the Department to officially confirm the case of the corrupted file with a letter if necessary.

Would the board consider this report enough to satisfy the proponent's response to review the geochemistry of the native rock for ARD/ML?

Shelly

On Fri, Jul 28, 2023 at 12:40 PM Shelly Brown <shelly.brown@semiltd.ca> wrote:

Thank you for the follow up, Assol.

I wanted to give you some new information about the ARD/ML comment from ECCC that you may be able to share with them for their review.

I have spoken to Gov NU, Lands Manager, and it is understood that an aggregate study was completed in 2004 that provided the Hamlet of Sanikiluaq with information they needed to determine what precautions and procedures operators should take handling the materials which would be outlined in the terms and conditions of their quarry permit. The proponent trusts that the Hamlet and operators are providing environmentally safe quarry materials for road building. We were not able to obtain a copy of the 2004 report as the Gov of NU noted that the file was corrupted.

Kind regards,

Shelly

Subject: Re: EXT: 8BW-ANU----; Type "B" Application by NNC for the Anuriguak Nukkitsautiit Project

Given that a previously unseen management plan a significant amount of information was submitted as part of the response, the deadline for the interveners' feedback is August 7. Provided the feedback is positive and there are no extension requests from the parties, I would budget another 2 weeks for the Board's decision. However, we are aware that the applicant would like to start work as soon as possible and will certainly take that into account.

Thanks for confirming about the plans.

Would it be reasonable to expect the license within the next 2-3 weeks considering the time it takes the interveners to be satisfied with the provided info and then the Boards decision making process? Our client is trying to schedule the project start date in that suggested timeframe and it would be much appreciated for any detail that you can provide me with.

Hi Shelly,

Your response and submitted spill and environmental protection plans are currently with the interveners for their confirmation of whether they are satisfied with the provided info. If so, the Board can move on to the decision-making process. The emergency response plan is not required.

Then, if the Board issues the licence, we can send out the IFCs you submitted earlier for review.

Hi Shelly,

If the spill plan has not yet been updated, it can come later. There is just a small change required as per your response, so it is not urgent.

The Environmental Protection Plan, however, has not been submitted before and is heavily referenced as the response to public review, so it is an important piece. A solution to that though, in the interest of time, is expanding on your responses where the sections in the EPP are referenced.

Subject: EXT: 8BW-ANU----; Type "B" Application by NNC for the Anuriquak Nukkitsautiit Project

Be cautious! This email was sent from outside SEM Ltd. Do not open links or attachments unless from a recognized and trusted sender.

Good morning,

Please see attached, CIRNAC and ECCC comments in regards to Water Licence No: 8BW-ANU----; Type "B" Application by NNC for the Anuriquak Nukkitsautiit Project. The Nunavut Water Board kindly requests applicant response by the deadline of **June 23, 2023**.

Copies of all documents received in support of this submission can be accessed through the NWB's Public Registry and FTP site using the following Link:

<ftp://ftp.nwb-oen.ca/registry/8%20MISCELLANEOUS/8B/8BW%20-%20Watercourse/8BW-ANU----/2%20ADMIN/3%20SUBMISSIONS>

The Nunavut Water board is aware that a number of web browsers are no longer supporting File Transfer Protocol (ftp). If you are having difficulty accessing our FTP site you may need to download an FTP application. We have been recommending the FileZilla Client below to access the files, which is a free and open source application. A link can be found below:

<https://filezilla-project.org/>

Please let me know if you have any questions or concerns.

Regards,

Robert Hunter
