## GOAL:

To meet the requirements of the "Land Use Permit" number N2002E0029 AULAJUAQ LIMITED will establish the following procedures to comply with Paragraph 22 of Section 31(1) (m) of the Annex to the LAND USE PERMIT Number N2002 E0029 issued on July 22, 2002 by Indian and Northern Affairs Canada Land Administration.

## Procedures:

I certify that Aulajuaq Limited will carry out the following procedures in case of an petroleum or chemical spill on the "Checkers Lake Access road Contract"

1 When a spill of petroleum or chemical occurs we will immediately phone the 24 hour spill report line at 1 867 920 8130. The spill report form no. NWT 1752 (05/93 attached) will be completed and faxed to the spill hot line office in Yellowknife.

The spill hot line office will immediately advise all concerned government agencies and stakeholders within Nunavut concerned about a chemical or petroleum spill.

2. When the spill occurs the immediate action will be taken to stop the continued contamination of the land and environment with hazardous material onto the land. Immediately after the spill occurs Aulajuaq staff will place "Matt A Absorb" sheets around the contaminate to contain the spread of the chemical or petroleum product

3 A supply of 6 sheets of "Matt A Absorb" will hold at the construction site at all times.

4 Any contaminated soils will be removed to the location within the Community of Chesterfield Inlet approved by the Nunavut Water Board for secure storage of Contaminated soils

5 The Spill Hot Line will be advised when all mitigation or remediation work has been completed

6 When Equipment is being refueled our employees will place protective mats on the ground to capture and minor fuel spills that occur during routine refueling of our construction equipment
