

# APPLICATION FOR WATER LICENSE AMENDMENT

(Water License 8BW-CLY0810)

## EXECUTIVE SUMMARY

The Water License 8BW-CLY0810 was granted by NWB to Qikiqtaaluk Corporation on March 3, 2009 to conduct repair work, culvert installation and the construction of a bridge over the River Clyde. Work was initiated in June 2009. The construction of the bridge is completed as well of some of the culvert installation. Similarly, the road repair is completed on about half of the existing road.

However, in the remaining area of the road, it was realized that damages were too severe and repair work was becoming useless. In consultation with some members of the community and some experienced Inuit workers, it was proposed to re-route part of the existing road in order to build a sustainable road that can be used on the long-term. An amendment to the existing License is requested to build the re-routed portion which includes the installation of culverts at 3 new creek crossings. On the other hand, culvert installation at 4 creek crossings that was already granted through the License will not anymore be required. A mitigation plan to restore all impacted grounds and waters on the existing road that will not be repaired is the subject of a separate document.
