---

Good Morning Philippe,

I apologize for the delay in returning your email. If the road is already owned by the Hamlet it might be best to have the Hamlet apply for the Licence with Qikiqtaaluk Corp. as a contractor that abides by the hamlets Licence. This would eliminate the issues of assignment or cancellation afterwards. Would this be an issue for Qikiqtaaluk Corp.? Hopefully, we could get this to the Board to make a decision within a week or two of receiving a copy of the application form with the Hamlet as the applicant and signed by the SAO.

Don

Hi Don

It is our understanding the road is already own by the Hamlet. We will make sure the Hamlet has this information so they can apply for their own license once our clean up project at Cape Christian is completed.

Thanks again,

Philippe

Have discussions have taken place with the Hamlet on the future ownership of the road? Our concern here is that the road cannot be unlicensed at any point without being in violation of the Act. We can continue forward at this point, I just wanted to raise the previous statement to your attention.

Thanks,

Don

Hi Don

Thanks for noting the expiry date which is too short. It should be modified to October 2010. Otherwise, QC is not intending to renew or assign the license past this date. The road will not be removed upon the expiry of the license as it is the will of the people of Clyde River to continue the road.

Let me know if you have any other questions.

Sincerely,

Philippe Simon, P.Eng., Ph.D.

Hello Philippe,

I have a couple last questions for you on the Clyde River Road Construction before the file can go to the Board. The requested expiry date of the licence would be June 1, 2009; is this sufficient or should the Licence be for a longer duration? Is Qikiqtaaluk Corporation intending on renewing, assigning the Licence to another entity or removing the road upon expiry of the licence? Thanks for any clarification you may be able to provide.

Sincerely,

Don Carr
