Licensing Administrator  
Nunavut Water Board  
P.O. Box 119  
Gjoa Haven NU X0B 1J0

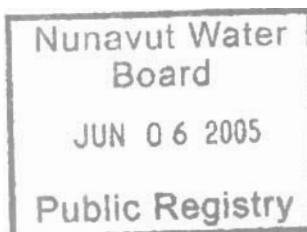

Enclosed you will find an application to the Nunavut Water Board for permission to proceed with an upgrade of ATV trail to the Diane River from The Municipality of Rankin Inlet. I have also attached a proposed map location, a translated project description, a thirty dollar cheque for the fee, and the Proposal for the Prospective Analysis and Preliminary Environmental Scan.

This request was in the hopper with the Water Board last year but we pulled it when the funding source fell through. We have some funds now in place and our anxious to proceed with this community priority. We have held a number of public consultations to date.

Please let me know if there is anything we can do to expedite this project. We have the assistance of the Engineering staff with C&GS should there be technical advice and design work involved. Our consultant will be completing the study in late June but we felt we need to apply now so as to get the application in queue.

Thank you

  
John Hodgson, CMO  
Senior Administrative Officer
