Dear Shawn Stuckey and Jivko Jivkov:

On December 4, 2015, the Nunavut Water Board (NWB) invited interested parties to review the Hamlet of Gjoa Haven's (the proponent) application for a type 'B' water licence for water use and/or waste disposal associated with the construction of the Swan Lake River Bridge.

Interested parties were asked to provide comments by January 4, 2016. Comments were provided by DFO (Department of Fisheries and Ocean) and AANDC (Indigenous and Northern Affairs Canada); they are attached.

Please, provide status of when to expect response to the reviewer's comments. Note that comments should be satisfactorily addressed by the Applicant in order to move further with the file.

I will be glad to answer any question related to this subject.

Regards

Sonia Aredes
