Good afternoon Derek,

Following the discussion you had earlier this week with Charlotte Mougeot for the Pond Inlet project, Tower Arctic was told that we will not need to complete an amendment of our actual license with the NWB for the crane refueling on the marine breakwater.

We would like to cancel the amendment process for license 8BW-PIM1821.

We apologize for the inconvenience.

Best Regards,

Simon-Pier Laberge

Hi Derek,

We didn't answer to Ida's email since we are waiting for the client to follow up about the NPC request. The NPC process for the project was completed by the client prior the beginning of the project so he is the only one who could bring modifications to the current determinations.

Once we will have the confirmation that the determinations have been modified including the activities proposed in the amendment, I'll follow up with you.
