Attention: Phyllis Beaulieu, Manager of Licensing

Dear Ms. Beaulieu:

Reference: Water License Application 8BW-REP----

In February 2009, Nunami Stantec, on behalf of the Hamlet of Repulse Bay, applied for a new water license to construct an access road to identified granular resources. The access road included several watercrossings and subsequent installation of culverts.

In mid 2010, Nunami Stantec, in association with FSC Architects and Engineers and FMA Heritage Incorporated, completed additional work for road design finalization and heritage resource impact assessments to support access road construction. However, licensing for the project now includes extraction of identified granular resources, including quarrying and pitting, as well as access road construction and culvert installation.

In light of this, Nunami would like to cancel the current water license application 8BW-REP---- and resubmit a new application in January 2011. Should you have any questions, please do not hesitate to contact the undersigned.

Respectfully submitted,

Nunami Stantec
