Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0

Attention: Phyllis Beaulieu, Manager of Licensing

Dear Ms. Beaulieu:

Reference: Construction and Operation of an Access Road and Borrow Sources at Repulse Bay, NU

On behalf of the Hamlet of Repulse Bay, please find enclosed an application for a new water license. The Hamlet wishes to construct an access road to identified granular resource sites (borrow sources) northwest of the community, and subsequently extract granular material from the borrow sources. As the proposed access road will cross several waterbodies, additional information supporting this license application has been included. The Hamlet will also require approval from Fisheries and Oceans Canada to cross waterbodies, the Government of Nunavut Department of Community and Government Services for land use and quarry development, and possibly the Nunavut Impact Review Board (NIRB) if a screening is requested by an Authorizing Agency. All permitting applications have been applied for concurrently.

To support this water license application, the following documents are included:

- NWB General Water License Application Summary in English and Inuktitut;
- NWB General Water License Application and application fee;
- NWB Supplemental Information Guideline for General Water Works (concordance table); and,
- Environmental Screening of the Construction and Operation of an Access Road and Borrow Sources at Repulse Bay, NU

One hard copy of these documents is provided in addition to digital copies on the enclosed CD.

I trust we have provided the NWB with sufficient information to process the license application. Should you have any questions or comments, please do not hesitate to contact us. Please address any correspondence related to this application to the undersigned.

Respectfully submitted,
Nunami Stantec
