

REPORT – NWB 8WLC-ASR1718 Approval Without A Licence

Project Name: Coastal surveys of Common Eider nesting islands along the South Baffin Coast

Licensee: Grant Gilchrist

Mailing Address: National Wildlife Research Centre, 1125 Colonel By Drive, Ottawa, ON, K1S 5B6

Water Sources used: Hudson Strait Watershed

Water Quantity taken: 1 m³/day

Water Source Coordinates: 64.33475° N, -74.67462° W
64.28761° N, -75.78308° W
64.03466° N, -73.58418° W

Waste Management and/or Disposal: Greywater and human sewage waste water disposal on site (sump), solid waste (garbage) brought out to Cape Dorset.

Sump Coordinates: n/a

Progressive Reclamation Work Undertaken:

All reclamation work for sites erected was completed during the license period. Drinking water was brought in from the nearby town of Cape Dorset. In some instances, water was collected from streams recommended from our guides. Consumption did not exceed 1 m³/day.

Ocean water was used for cooking and cleaning at each of the short term camps sites. Produced grey water was disposed of in a sump dug nearby each camp, but at least 100 m away from flowing water. The sumps were filled in prior to closing the camp with the original soil, being careful to leave no depressions.

Human waste was put into a separately dug sump, also away from camp and a minimum of 100 m away from a flowing water source. Again, this sump was filled in with the original soil, careful to leave no depressions in the land.

All garbage and other solid waste was brought back to Cape Dorset for proper disposal at the end of the field work on July 31st.
