TITLE: Land and water research at the Cape Bounty Arctic Watershed Observatory  
(CBAWO), Melville Island

### OBJECTIVES OF RESEARCH:

Our work is intended to determine how climate change affects the land and water quality. Our work involves taking sediment and water samples from the lakes and streams at Cape Bounty. We have chosen these lakes and rivers because the rivers appear to supply an abundant sediment and deep lakes are needed to preserve the sediments for our research.

### TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

### DATA COLLECTION IN NU:

DATES: May 15, 2016-August 30, 2016

LOCATION: Cape Bounty

Scientific Research License 02 028 16R-M expires on December 31, 2016

Issued at Iqaluit, NU on March 30, 2016
