

Cover Letter for Approval without a license renewal for Contwoyto Lake Camp

To Whom it May Concern,

The camp that we have set up at Contwoyto lake for hunting tourism operations in conjunction with the Burnside HTO is located on the old "cache point" location described in the application. Here we have set up a wooden 16x32 tent frame for a kitchen as well as a wooden 12x16 tent frame for the guides tent. We also have a small steel storage bin set up where we keep some of our equipment stored over the winter. While we have guests in camp we also have two guest tents and two more small staff tents set up without tent frames. This year it looks like we will only have 23-26 guests total over the course of the season. We will have approximately ten drums of fuel and gas in camp this year. We also have an outhouse. Per the inspection in fall of 2017 we have moved the outhouse and fuel drums a few yards further up to be more than 31 meters from the high water line. We also have a bear fence to deter bears. Any water used is carried up from the lake in pails and used for drinking and washing dishes. Our water consumption is less than a cube per day and our waste is much less than a cube per day. This remains a small scale seasonal operation operating from Aug 8th at the earliest to Sept 16th at the latest this year.

Thanks for your time in processing this application renewal.
