RE: 8WLC-CUL1819 – Approval for the Use of Waters and Deposit of Waste Without a Licence

Dear Richard,

This letter is to inform you that Barrick will not be doing further exploration work next year in the area relating to this water licence. As such please find below the details required for reporting the water use during the period August 7, 2018 to August 17, 2018.

1. 0.038 cubic liters of water per day was used for the 10-day period for a total of 0.38 cubic meters. This was gathered using 5-gallon buckets over the course of the field work.
2. Approximately 0.02 cubic liters of waste water was deposited in a small pit at the side of the Cullaton airstrip. The remaining was sewage deposited in an existing drop toilet at the airstrip.
3. Waste deposited consisted of grey water from cooking and dishwashing, plus sewage in the drop toilet.
4. Waste was deposited at 61.316991° N and -98.498937° W
5. Waste water contained only food particulate and washing detergent.
6. A note was each time the 5-gallon buckets were refilled to track the total water consumption. The split between greywater and sewage is an estimation.
7. Biodegradable detergents were used for washing cooking equipment and the greywater contained in a gravel pit on the runway margin which was filled in on departure. The toilet was treated with lime for hygiene.

Please be advised that I will no longer be working for Barrick Gold after January 18th 2019 but remain available to provide more information up to that point.

Yours sincerely
