

# Map showing 2019 proposed sites for palaeontology research, Strathcona Fiord, Ellesmere Island, Nunavut

The sites in red are on Inuit Owned Land.

One site is our proposed camp site with jet-B fuel cache. We would like to camp here for four nights. The other site is the Beaver Pond site.

The blue polygons are other proposed sites that are outside the Inuit Owned Land, between Strathcona Fiord and the east side of Vendom Fiord. We will stay at Fyles Leaf Bed site (FLB) for 8 nights. We will visit the other sites briefly this year. If they are potentially useful for paleontology study, we will request to return in a future season.

Google Earth image of the sites in or near Inuit Owned Land in the Qikitani Region

**Strathcona Fiord beach (campsite and fuel cache): 78.571748°N, 82.303553°W**

**Beaver Pond site: 78.550980°N, 82.373544°W**

**Outside of Inuit Owned Land**

**Fyles Leaf Bed site (FLB) 78.487556°N, 82.630500°W**
