Good day Marc, as I indicated above there are outstanding obligations on your Type B file that need to be addressed. You qualify for an "approval without a licence" however the issues with the Type B will need to be actioned at some point so that we can move forward to a yearly "approval"

Hello Phyllis,

And Happy New Year!

I am in the process of writing our annual reports in order that our file may be closed, and will send those to you shortly. However in reviewing our water use over the five year period of our permit a few questions come to mind. It seems that our water consumption is very low compared to what we are approved to obtain from Nettiling Lake. According to Part C, item 1 of the permit we are approved to use up to 5 cubic meters of water **per day**. According to the camp personnel, our water use amounts to 70 liters/day (0.07 cubic meters). Our camp is occupied for 10 days each year, which means we use 700 liters/year (0.7 cubic meters). Over the **5 year period** of the permit our total use was **3.5 cubic meters**, still less than our approved daily limit. Is this sufficient use to necessitate applying for a Water Licence? Is there a minimum threshold of use where a permit is not required? If there is still a requirement for a Water Licence I will move ahead with that, but any information with respect to this would be appreciated.

Thank you,

Marc

Subject: Re: Application for Water Licence - Environment Canada, CWS Winnipeg

Good morning Marc:

I have reviewed your file and provide the following information. Based on the amount of water authorized you would qualify for an approval without a licence. However the 3BC-NET0913 file will require closure by the AANDC Inspectors, therefore my recommendation would be to continue with a type B application for renewal at this time.

Currently there appears to be Inspection issues relating to clean up by the proponent. As well, our office has no record of receiving any annual reports for 2009, 2010, 2011, 2012, and 2013 (attached is a copy of the last AANDC inspection conducted on the project area).

In accordance with Part H, Item 1 of the terms and conditions of the attached licence, there was a requirement to submit a revised Spill Plan addressing several issues. To date the revised plan has not been received. As part of the renewal I would suggest submission of the revised plan, for approval.

In accordance with Part I, Item 1 of the terms and conditions of the attached licence, there was a requirement to submit an Abandonment and Restoration Plan. This also has not been received.

If you require additional information please don't hesitate to contact our office.

Hello Ms. Beaulieu,

I am contacting on behalf of Environment Canada, Canadian Wildlife Service & Jim Leafloor concerning a Water Licence application for 2015. In the past we have had a Water Licence (File#3BC-NET0913) for our field camp on Nettilling Lake in the Qikiqtani Region, Nunavut. I would appreciate any information you can forward so that I may begin the application process for next field season.

Thank you,

Marc Schuster
