Hi Tamara.

I am reviewing the information in your application and noticed a few items which require your attention or clarification.

Application

in the application form, in block 13, the signature block, one of the statement in which you are required to certify, you marked down "N/A" (as it relates to deposit of waste). all statements must be marked as "Yes" or "No", and N/A is not an acceptable response.

Waste Disposal

I was reviewing the previous license for this project, License 3BC-NWT1113. The licensee requires the Spill Plan to be revised and approved by the board. please see attached latest correspondence regarding this matter. The current application for authorization without a license, 8WLC-NWT----. No mention on fuel requirement and or handling for the project, however, I am assuming that fuel requirement may be similar to the previous 3BC-NWT1113 License? and if that is the case, the appropriate changes will be required to the Spill Plan prior to be able to move forwarding with the authorization without a license.

Please let me know if you have any questions.
